Enovis' ARVIS® Awarded the AAHKS Industry Innovation Award at the 2022 American Academy of Hip and Knee Surgeons Annual Meeting

November 10, 2022

WILMINGTON, Del., November 10, 2022 (BUSINESS WIRE) – Today, Enovis Corporation (NYSE: ENOV), an innovation-driven medical technology company, announced that the company's ARVIS® Augmented Reality Surgical Guidance System received the Industry Innovation Award at the this year's American Academy of Hip and Knee Surgeons (AAHKS) Annual Meeting. This annual award recognizes cutting-edge innovation in products, procedures and services in the field of Hip and Knee Arthroplasty.

ARVIS is the only FDA-cleared proprietary, real-time, hands-free augmented reality (AR) technology engineered for orthopedic surgeons, so they can visualize precision guidance when performing hip and knee surgery. With its streamlined design, ARVIS has a more economical price and footprint than large robotic systems, so it can be easily adopted and scaled by a wide array of ambulatory surgical centers and hospitals, allowing more access to patients wishing to experience the benefits of a technology assisted knee or hip replacement.

"We are absolutely thrilled to receive this award and be recognized by such a prestigious organization as AAHKS," said Louie Vogt, President and General Manager, Enovis Surgical™. "ARVIS represents the next era of orthopedic technology and we look forward to continuing to expand our feature set and capabilities to improve patient care and outcomes with cutting-edge innovation in the future.

ARVIS is compatible with Enovis' innovative EMPOWR™ Hip and Knee product offerings, including EMPOWR™ 3D, Porous and Partial Knee, EMPOWR Acetabular® and Dual Mobility, along with compatible femoral stems.
